Development Planning, Monitoring, and Evaluation professional with experience in marine and fisheries program management, international grant monitoring, and evidence-based evaluation. Currently serving as a focal point for an international conservation grant with responsibilities spanning project planning, implementation monitoring, field verification, stakeholder coordination, reporting, and synthesis of lessons learned for adaptive management. Experienced in monitoring and evaluating national marine and fisheries priority programs within the Ministry of Marine Affairs and Fisheries, including fisheries modernization, sustainable aquaculture, coastal community development, and Blue Economy initiatives. Strong capabilities in Logical Framework-based monitoring, performance measurement, quantitative and qualitative data analysis, field assessment, policy analysis, and technical reporting, with experience working across government institutions, local communities, technical teams, and development partners.

## Core Competence

- **Planning, Monitoring, and Evaluation :** Logical Framework, Theory of Change, Results-Based Management, Project Monitoring, Field Verification, Performance Measurement, Project Cycle Management.
- **Data & Evidence :** Quantitative and Qualitative Analysis, Baseline Assessment, Indicator Tracking, Trend Analysis, Impact Assessment, Evidence Synthesis, Field Data Collection.
- **Program & Stakeholder Coordination :** Strategic Planning, Project Coordination, Stakeholder Engagement, Technical Reporting, Policy Analysis, Regulatory Review, Cross-functional Collaboration.
- **Marine & Fisheries :** Marine Conservation, Fisheries Management, Sustainable Aquaculture, Coastal Community Development, Blue Economy, Community-based Resource Management.

## Professional Experience

**Marine and Fisheries Program Assistant Expert**

*Planning Bureau, Ministry of Marine Affairs and Fisheries (MMAF), Jakarta | January 2026 - Present*

- Serve as the primary focal point for an international conservation grant-supported initiative, overseeing project planning, implementation, monitoring and evaluation, stakeholder engagement, and reporting.
- Coordinate with government technical units, local communities, conservation stakeholders, and development partners to facilitate project implementation, verify field evidence, and address implementation challenges.
- Conduct field-based monitoring and evaluation of marine and fisheries programs, assessing progress, performance indicators, stakeholder participation, and program outcomes.
- Conduct quantitative, spatial, and qualitative multidimentional performance analyses to identify implementation gaps, assess program performance, and develop evidence-based policy recommendations.
- Track program implementation and budget realization for prepare the monitoring reports, analytical briefs, and executive materials to support management decision-making.
- Developed a Spatial Decision Support System (SDSS) to support evidence-based site selection and implementation planning for thematic aquaculture programs across 500+ municipalities.

**Marine and Fisheries Program Analyst**

*Planning Bureau, Ministry of Marine Affairs and Fisheries (MMAF), Jakarta | June 2025 – December 2025*

- Conducted policy research, technical assessments, and implementation reviews for priority programs related to fisheries modernization, aquaculture development, and coastal community empowerment.
- Coordinated project monitoring activities and consolidated implementation reports from multiple directorates and technical units.
- Supported the integration of Blue Economy principles into strategic planning and policy frameworks through data analysis and stakeholder consultation.
- Developed Ministry Strategic Planning (Renstra) and Gender Mainstreaming Roadmap through

regulatory review, stakeholder engagement, and policy gap analysis.
- Prepared monitoring reports, policy briefs, performance evaluations, and budget utilization analyses to support program decision-making.

## Additional Professional Experience

**Regional Planning Studio Assistant**

*Bandung Institute of Technology (ITB), Bandung | June 2024 – December 2024*

- Reviewed analytical outputs, planning recommendations, and technical reports related to regional development and spatial planning across five planning dimensions: environment, infrastructure, demographics, regional economy, and institutional financing.
- Mentored 30 students across five planning disciplines through 23+ technical consultation sessions, ensuring consistency between planning assumptions, objectives, and regional issues.

**Human Settlement Laboratory Assistant**

*Bandung Institute of Technology (ITB), Bandung | June 2024 – December 2024*

- Developed teaching materials on human settlement theories (shell, network, nature, human resources as human & society) and research methodologies for over 40 students.
- Guided seven student groups through research design, fieldwork preparation, data analysis, and final reporting.

**Urban and Regional Statistics and Analytics Assistant**

*Bandung Institute of Technology (ITB), Bandung | August 2022 – May 2024*

- Designed and delivered learning materials on quantitative and qualitative statistical analysis for planning and policy evaluation.
- Facilitated 80+ practical sessions involving STATA, JupyterLab, RStudio, and Atlas.ti for approximately 50 students.

**Junior Planner Assistant**

*Directorate of Housing and Slum Settlement Areas, Ministry of National Development Planning (Bappenas), Jakarta | June 2023 – August 2023*

- Developed national baseline datasets covering 94 municipalities to support monitoring, policy evaluation, and evidence-based planning for housing and settlement development.
- Conducted quantitative analyses, proposal assessments, and policy evaluations to support investment prioritization and implementation of housing development programs across four metropolitan regions.
- Participated in proposal assessment and harmonization processes for more than 50 local governments applying for the Integrated Slum Settlement Alleviation Fund (DAK TPPKT).
- Contributed to strategic projects, including the National Long-Term Development Plan (RPJPN) 2025–2045, housing PPP initiatives, housing finance reform, rental housing programs, and public service standards development.

## Selected Projects

**Blue Economy Monitoring and Evaluation (2026)**

- Conducted field-based monitoring and evaluation of Blue Economy programs across Eastern Indonesia to assess implementation progress, program effectiveness, and alignment with development objectives with Logical Framework Implmentation.
- Evaluated community-based fisheries management, marine conservation, fisheries-resource, and capacity-building initiatives performance indicators, stakeholder participation, implementation challenges, and outcomes through field assessments, interviews, and data analysis.
- Developed planning databases and synthesized findings into evidence-based recommendations to support adaptive program management and policy improvement in collaboration with international development partners.

## Education

**Master of Development Studies**

*Bandung Institute of Technology (ITB), Bandung | August 2024 – August 2025*

- **GPA :** 3.89/4.00 (Magna Cumlaude)
- **Academic Role :** Data Coordinator (Development Policy Studies)

- **Relevant Coursework :** Analysis and Evaluation of Public Policy, Development Project Management, Public Policy Process, Community Empowerment, Sustainable Development, and Development Policy Studio.

**Bachelor of Urban and Regional Planning**
*Bandung Institute of Technology (ITB), Bandung | August 2020 – June 2024*

- **GPA :** 3.65/4.00 (Cumlaude)
- **Academic Role :** Spatial Structure Lead (Regional Planning Studio); Infrastructure Lead (Detailed Spatial Planning Studio); and Observation Coordinator (Planning Process Studio).
- **Relevant Coursework :** Development Control, Planning Evaluation Technique, Planning Law, Regional Economics, Infrastructure and Transportation Economics, Social System and Community Development.

## Technical Skills

- **Spatial Analysis :** QGIS, Google Earth Engine, Google Earth Pro, and Google My Maps
- **Data Analysis :** STATA, JupyterLab, RStudio, and Atlas
- **Design & Visualization :** AutoCAD, SketchUp, Canva, Figma
- **Productivity Tools :** Microsoft Office (Excel, Power Point, Document, etc.) and Google Workspace

## Certifications

- **Certifications ☑ :** Workshop ArcGIS System in Data Analysis and Visualization.
- **Certifications ☑ :** TOEFL Prediction 567.
